Back to School Germ Protection with YL Products

It's back to school time, and moms everywhere are facing the prospect of their children bringing innumerable germs into the home. In fact, a child's hands are the chief importer/exporter of cold, flu and other germs at home and school. They are the perfect vehicle for spreading such germs, and are the primary cause of about four colds a year for adults, six colds a year for children, and even more bouts of the flu.

Adding to the problem is that the media, doctors and others continually tell us to use harsh disinfectants and sanitizing products. But most of these are NOT SAFE.

The good news is that Young Living offers effective, easy-to-use and safe personal care products in which therapeutic-grade essential oils are the active ingredient. That means the best of nature is providing these products' anti-germ protection. These YL products:

- Eliminate harsh and abrasive chemicals
- Eliminate fumes that can irritate skin and lungs
- Remove the danger of chemical exposure or poisoning

Using YL Personal Care Products to Protect from Unwanted Germs

Using YL personal care products is a fantastic way to protect from the cold, flu and other health problems. Just throw away the chemical-laden soaps and cleaners and commit to using the family of Thieves products (described below). They'll make the shift from harsh chemicals to safe, gentle cleaners an easy and pleasurable one.

How safe are YL products? They are so pure, you can eat them. And they're just as effective, with all the proven antimicrobial power of Thieves essential oil to clean while being gentle on the skin.

Thieves Foaming Hand Soap: An effective germ-buster cloaked in a creamy, emollient lather.

Thieves Cleansing Soap: Gently removes dirt and oils from the skin, leaving it soft and clean.

Thieves Waterless Hand Purifier: Perfect for protecting against germs on hands when you're not at home. Can be used anywhere.

Where Are the Germs?

The following are the most common "hot spots" for germs to reside:

- door knobs
- light switches
- computer keyboards and mouse
- phones and earphones
- remote controls
- kitchen and bathroom faucet handles
- refrigerator handles
- toys

The majority of germs on your hands (about 90%) are hiding under your fingernails. And those fingertips touch the face (including mouth, nose and eyes) about 12,500 times every year! So wash under the fingernails!

Using YL Surface Cleaners for Safe, Effective Protection

The surfaces kids encounter every day—classroom desks, drinking fountains, computers, and so on—present a significant germ threat. Bacteria, viruses and other pathogens can survive on virtually any surface. Clearly, we need more effective cleaners that are safe for both adults and children. And Young Living delivers just the solution—Thieves Household Cleaner.

This multipurpose cleaner is formulated to destroy germs and bacteria on hard surfaces, as well as to easily clear dirt and grime. Once you try it, you'll be amazed at its superior cleaning power and versatility. Customers also rave about how it solves other difficult problems like old stains and caulk.

Why Young Living Personal Care Products?

- **Multi-Purpose Protection.** Hand cleansers, surface sanitizer, stain remover, laundry booster and more
- **Safe, Pure & Non-Toxic.** Absolutely all-natural and chemical free.
- **Concentrated & Economical.** One small bottle produces 28 quarts at less than \$1/quart!
- **Proven & Powerful.** Over 500 clinical studies prove the antimicrobial potency of the essential oils in Thieves.

Wash Your Hands!

In addition to using safe, gentle and effective Young Living products, it's important to first to emphasize proper hand-washing. Washing hands is the first line of defense against bacteria, viruses and other unwelcome pathogens.

- Rub hands vigorously together for about 30 seconds
- Scrub everywhere on the hands, including backs of hands, wrists, between fingers and especially under the fingernails
- Rinse well and dry hands with a clean towel
