## *Give the Gift of Purity*

The month of February is synonymous with love, and what better way to express your adoration to the wonderful people in your life than by introducing them to the incredible benefits of Young Living's essential oils? Inside every bottle, you'll find more than just the powerful essence of nature—you'll find the love that comes from using and sharing a product that has been sourced, distilled and packaged with the highest of standards. Young Living calls it the Seed To Seal Quality Commitment, but you might call it dedication—dedication to ensuring that you (and the people you love) receive *the very best*.

### *The Seed to Seal process includes five steps*

- 1. Seed:** Powerful, effective essential oils come from seeds and plants that are verified for their potential to produce high-quality essential oils. The seeds we use are selected for their scientifically proven ability to become plants with the highest possible levels of bioactive compounds.
- 2. Cultivate:** Young Living farms use responsible and sustainable farming methods, and each is groomed to a superior quality standard.
- 3. Distill:** Innovative approaches and proprietary techniques make Young Living a leader in essential oil distillation methods.
- 4. Test:** Young Living never accepts diluted, cut or adulterated oils and each oil is tested in both internal labs and third-party facilities.
- 5. Seal:** All oils are handled with care, using state-of-the-art equipment and facilities to carefully bottle and label each one.
