

Product Summary

Young Living's Prostate Health is uniquely formulated for men concerned with supporting the male glandular system and maintaining healthy, normal prostate function. Prostate Health is an essential oil supplement featuring powerful saw palmetto and pumpkin seed oil—ingredients known for their support of a healthy prostate gland. A proprietary blend of pure geranium, fennel, myrtle, lavender, and peppermint essential oils provides the body with key anti-inflammatory components through the constituents citral, anethole, and linalool. These precision-delivery vegetable softgels quickly absorb into the system, thereby supporting healthy inflammation response and normal urinary tract function. Prostate Health is uniquely formulated to deliver 470 mg of saw palmetto, 370 mg of fatty acids, and 200 mg of Young Living's essential oil blend per daily dose.

Primary Benefits

- + Supports healthy prostate function and overall male glandular system.
- + Helps maintain healthy urinary tract function and male life activities.
- + Supports healthy inflammation response.

Who Should Take Prostate Health?

- + Adult males 40 years of age or older.
- + Any adult male who desires a healthy prostate and overall male glandular system support.
- + Any adult male who wants to support a healthy sex life and urinary tract flow.

Suggested Use

- + Take 1 softgel two times daily.

Cautions

- + If you're taking medication or if you have a medical condition, consult a health-care practitioner prior to use.
- + Saw palmetto may possibly affect the blood's ability to clot and could interfere with any blood-thinning drugs you may be taking, including Warfarin (Coumadin), Clopidogrel (Plavix), and aspirin.
- + Saw palmetto may cause mild side effects, including stomach discomfort.
- + This product is intended for men. Not for use by women or anyone under 18 years of age.

Peppermint (<i>Mentha piperita</i>) [†] leaves	**

**Daily Value (DV) not established.

OTHER INGREDIENTS Non-GMO modified cornstarch, carrageenan, glycerin, sorbitol, purified water

Did You Know?

- + The prostate is a walnut-sized gland that grows rapidly during puberty and then doesn't change until about age 40, when it slowly begins growing again and often becomes victim to cell overgrowth.
- + More than half of adult males are bothered by their growing prostate and in their lifetime will develop one of three prostate diseases: enlarged prostate, prostate cancer (malignancy), or prostatitis (infection of the prostate).
- + Normal prostate function can be supported by starting a natural, herbal prostate health regimen.
- + For maximum benefit, Prostate Health should be taken consistently over time.
