

Vitality Drops Info:

Wanted to make sure that you all see the following information about the new YL Vitality Drops.

The natural flavor used in YL Vitality Drops Lavender Lemonade is sourced from Lavender and Lemon as well as other natural PLANT sources. We chose this flavor because the vendor who provides these flavors went through the very stringent Seed to Seal audit to ensure that no synthetic ingredients, and no carriers are used in the processing of the material that we use from them.

The natural flavor used in YL Vitality Drops Grapefruit Bergamot is sourced from Grapefruit and Bergamot as well as other natural PLANT sources. We chose this flavor because the vendor who provides these flavors went through the very stringent Seed to Seal audit to ensure that no synthetic ingredients, and no carriers are used in the processing of the material that we use from them.

YL Vitality Drops Lavender Lemonade and Grapefruit Bergamot is a liquid that is a homogenous, emulsified solution with multiple ingredients, as well as the essential oils. Because the product is a homogenous, emulsified solution, the essential oils contained in the formula will not compromise the integrity of the plastic container.
