Make a shift natural wellness

YOUNG LIVING ® EST. 1994 SEED TO SEAL QUALITY COMMITMENT

Welcome to

YOUNG LIVING!

Young Living is a global movement to empower the world with nature's living energy: essential oils. People everywhere are searching for ways to create healthier homes by ditching the dirty status quo and products with synthetic "mystery" ingredients. By switching to Young Living® products with the life-giving energy that comes through the purity of Mother Nature's plant kingdom, we can promote healthier lives and leave behind a better world for our loved ones. This is an exciting time of growth, as more people are looking for products they can trust for a life that's free of harsh chemicals; a life where they don't have to compromise on what they bring into their homes.

Young Living's commitment is to offer everyone the opportunity to live freer lives with peace of mind and wellness with our clean, natural solutions.

As the world leader in essential oils, our company is the standard-bearer for this global movement dedicated to providing the most and best premium essential oils and nutritional supplements infused with essential oils available on the market today.

The beating heart of Young Living is our proprietary Seed to Seal® quality commitment. That commitment entails the oils that come from our farms and partner farms and also promotes our commitment to providing you with the highest quality proprietary supplements and food products for anything that carries our name. We invite you to visit our farms throughout the world for a firsthand look at our passion for quality.

This Young Living® Product Guide is designed to help you quickly find what you're looking for—locating old favorites, as well as discovering new ones you haven't yet tried. Our products are here to empower you as you create your environment of freedom and well-being and learn how nature's living energy can touch and enhance every part of your life.

We look forward to hearing about your old and new favorites and the benefits they bring to you, your family, and friends around the world. Thank you for being part of this great legacy with a purpose fueled by your passion and excitement as we take the mission of Young Living to the far corners of the earth, bringing wellness, abundance, and happiness to all.

SUSTAINABILITY, QUALITY, AND PURPOSE

We live in a manufactured world as we deepen the divide between ourselves and the great outdoors. From pine-scented candles to peppermint toothpaste, our homes are filled with products that contain only trace remnants of the natural world. Instead of turning to man-made synthetics to solve our problems, we're turning back to nature to live healthier, cleaner lives.

As the leader in the modern essential oils movement, Young Living has paved the way toward greener living by blending nature and innovative and proprietary technology to draw us closer to the world around us. For over 25 years, we've defined what it means to deliver the most pristine, potent oils on the market. That quality relies on our Seed to Seal® quality commitment, ensuring that every product reflects our rigorous, thoroughly tested, top-to-bottom quality approaches.

With a 99 percent landfill-free status, a trophy shelf of clean building awards, and more than 2,500 harmful mainstream chemicals banned from our product formulations, we help you reduce your harsh chemical footprint while simultaneously eliminating our own. Our planet takes care of us, and we return the favor with recycling, waste-cutting, regenerative agriculture, and more to deliver products to your home using the most responsible and sustainable methods.

The synthetic world we live in might be what we're used to, but we aren't confined to the material world. Ancestral knowledge about the workings of nature is all around us. By connecting and learning from the natural world, we live in harmony with the planet and have the potential to elevate and transform our lives.

Connect with nature—explore our oils

SEED TO SEAL

OUR QUALITY COMMITMENT

We created Seed to Seal® as a set of rigorous quality benchmarks that put people and planet first. Seed to Seal's three pillars—Sourcing, Science, and Standards—let you fall in love with Young Living products knowing that inside each bottle, tube, box, or bag is a powerful product with a sustainable story.

SOURCING

Quality products come from quality sources. That's why we work exclusively with Young Living corporate-owned farms, partner farms, and Seed to Seal-certified suppliers around the globe, so we can source conscientiously and prioritize quality as well as community and ecological impact. Our sourcing philosophy means that you never have to choose between quality and conscience.

SCIENCE

Purity starts in the field, but it's proven in the lab—two in-house labs and more than a dozen leading independent labs, to be exact. Every batch of Young Living essential oil undergoes advanced purity and efficacy testing and retesting by the 50+ highly trained scientists at our D. Gary Young Research Institute. Products that aren't pure enough or powerful enough—or that simply aren't perfect—never make it to your home.

STANDARDS

Our decades of leadership mean that we're responsible for setting—and surpassing—the definitive green standard for others to follow. This requires a rigorous commitment to environmental standards that put people and the planet over profits. We proactively design, evaluate, and regulate our process to ensure we do things the right way.

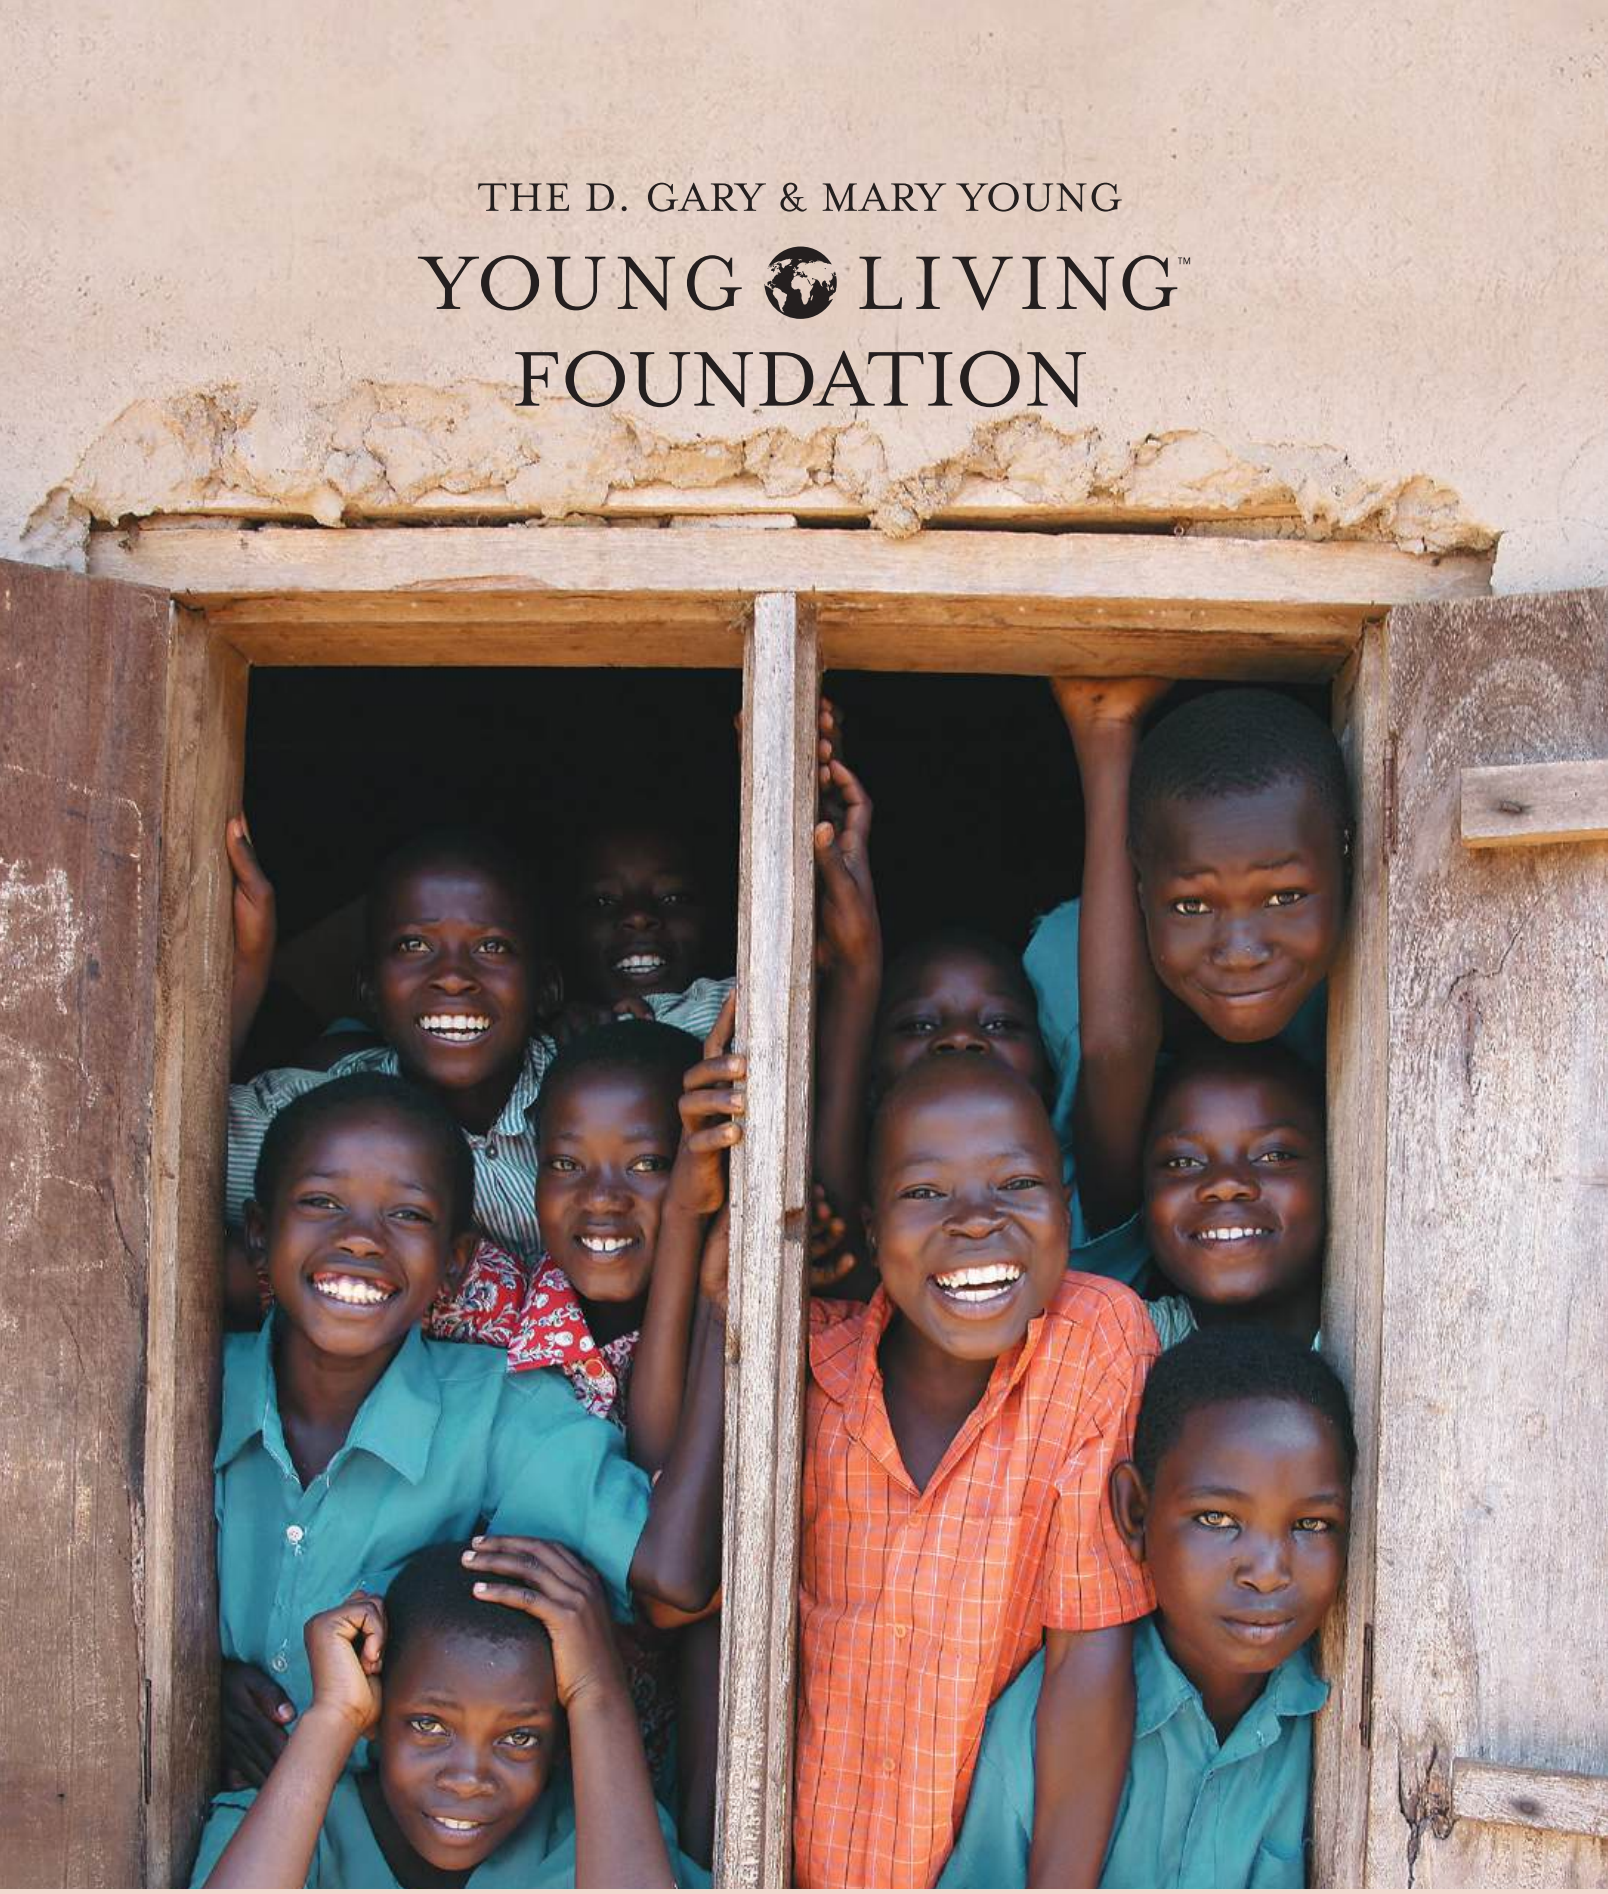

SOCIAL IMPACT

As guardians of people and the earth, we're committed to helping our world thrive for generations to come. Your support empowers us to make a lasting impact through The D. Gary Young, Young Living Foundation; supply chain integrity; and responsible farming practices.

Seed to Seal informs and inspires everything we do. For more detailed information on our Seed to Seal pillars, please visit SeedtoSeal.com.

THE D. GARY & MARY YOUNG

YOUNG LIVING™ FOUNDATION

PROVIDING A HAND UP SINCE 2009

OUR MISSION:

To nurture potential, rescue the harmed, and protect the earth

For over a decade, The D. Gary Young, Young Living Foundation has partnered on dozens of projects worldwide that have helped over 1 million individuals meet their basic needs and access the opportunities they need to dream, create, and thrive. Over the years, we've seen children overcome barriers to attend college, mothers bring their families out of poverty, and girls escape the shadows of exploitation to become leaders of their own lives.

GET INVOLVED:

Our impact is propelled by the support of people like you who are committed to making a real difference for people in need around the world. Together, we can continue to accelerate good and change lives for the better.

Learn more at YoungLivingFoundation.org/get-involved.

OUR THREE FOCUS AREAS:

NURTURE POTENTIAL

Unlocking opportunity through education and women's small-business enterprise

RESCUE THE HARMED

Safeguarding the vulnerable from abuse and human trafficking

PROTECT THE EARTH

Supporting conservation efforts that bring about change in the natural environment

THE FARMS

While our modern world is a miracle of engineering, it hasn't been such a miracle for our planet. Today's farming practices produce contaminated, modified crops and products that would be unrecognizable to our ancestors. To provide the most potent and nutritionally dense products on the market, we're going back to our farming roots, valuing quality over quantity.

When our founder, D. Gary Young, started the modern essential oils movement, he knew we couldn't harvest from farms that produced low-quality crops. Instead, he built his own farms. Unlike many commercial farms, Young Living's farms have never been sprayed with glyphosate—commonly known as Roundup—or any other harsh chemicals. This ensures the source of our botanicals is as pristine as possible.

At our many corporate-owned farms around the world, you can find a fusion of ancient and modern farming practices that ensures that the natural essence of each plant is honored and preserved from start to finish. This is the foundation of our Seed to Seal® quality commitment, which backs every essential oil and ingredient-based product we deliver to your home. From the trusted sources of our essential oils and select product ingredients to innovative, science-backed proprietary formulas and rigorous quality tests, we set and exceed the highest quality standards. Seed to Seal is governed by the activities defined within our three guiding pillars: **Sourcing, Science, Standards, and Social Impact.**

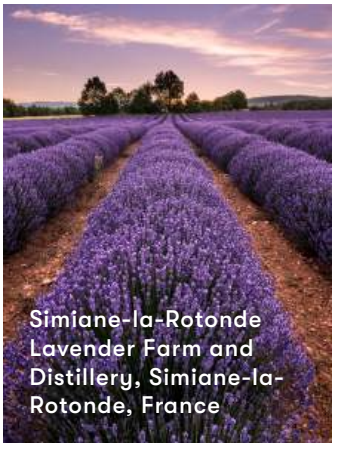

This rigorous quality commitment ensures that the products in your home are as clean as nature intended, helping you connect back to the planet while doing your part to keep it green. Now with more than 24 farms across six continents, Young Living has set the standard for sustainable farming practices around the globe.

HOW TO USE YOUNG LIVING® ESSENTIAL OILS:

Three main methods

Aromatically

All Young Living essential oils feature a signature aroma you can smell for a wide variety of benefits. One oil's crisp scent can be invigorating, while another's soothing aroma can help you unwind after a long day. Here are some ways to experience the aromatic benefits of a Young Living essential oil:

- Inhale directly.
- Use a diffuser.
- Mix with your DIY cleaners.

Topically

Applying essential oils topically allows your skin to absorb the benefits. Visit our website product pages for suggested uses to explore or start with these tips:

- Apply on your feet, wrist, chest, or neck.
- Add to your moisturizer or other personal care products.
- Use in a massage.

Safety tip: Follow each oil label's dilution instructions; many oils need to be diluted with a neutral carrier oil like olive oil or coconut oil. Also, be aware that some oils, particularly citrus, can cause photosensitivity in the sun and are best applied at night.

Internally

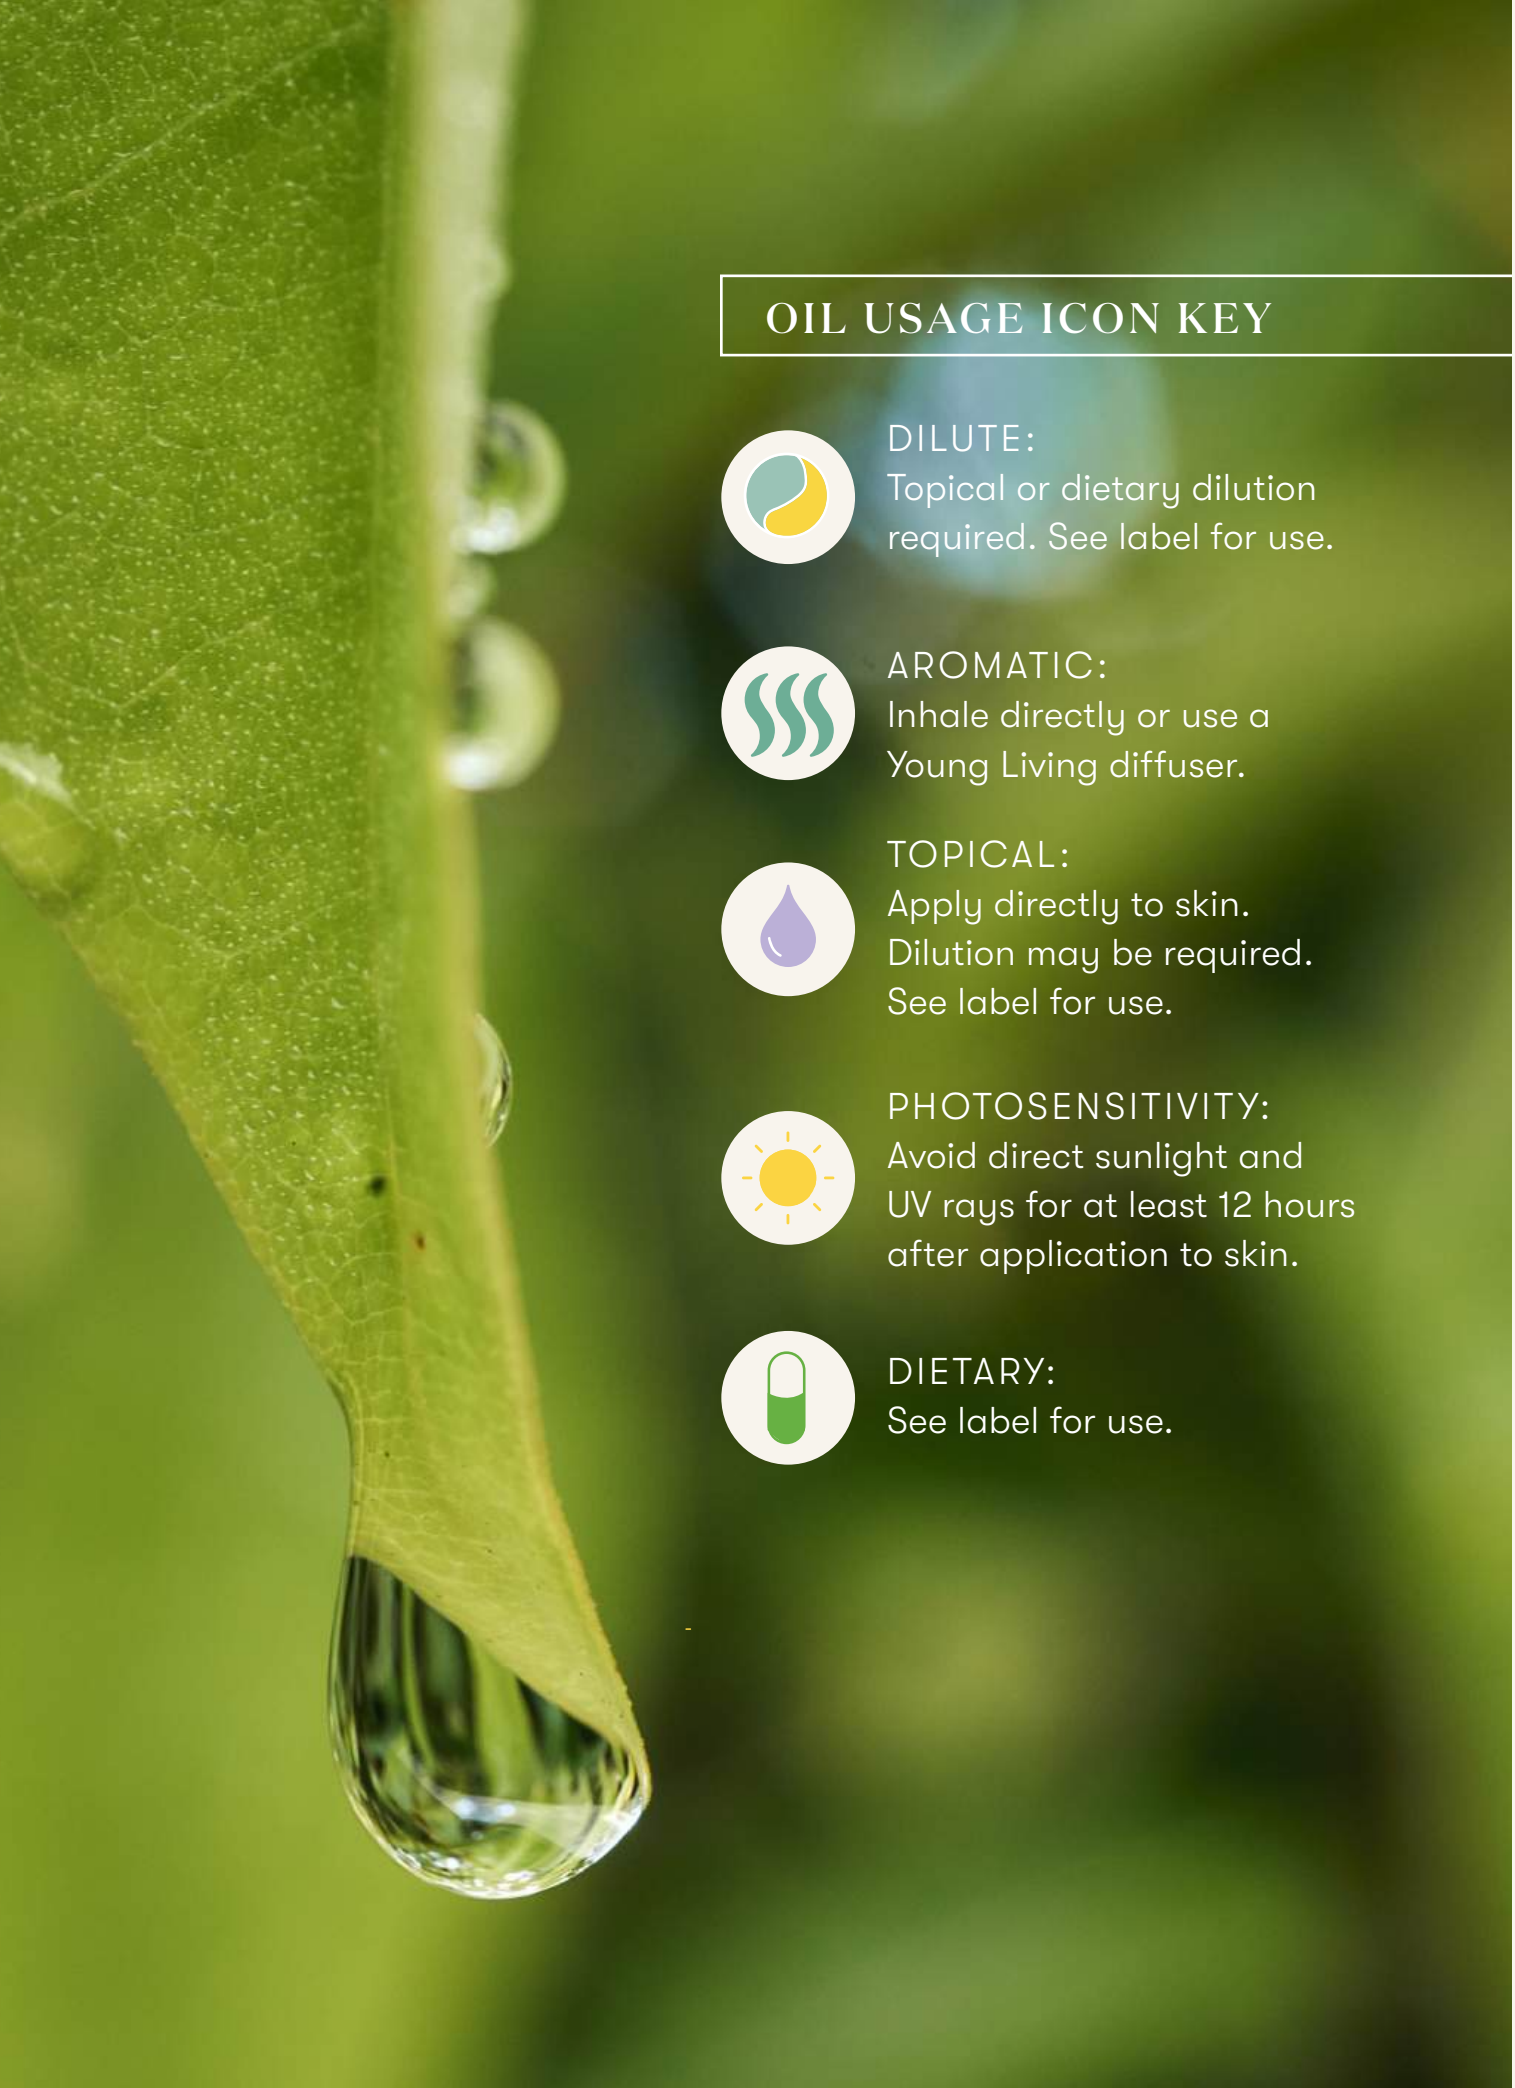

There are some Young Living essential oils that are generally regarded as safe (GRAS) to take internally as a dietary supplement and/or in your recipes. If you think an oil smells terrific, wait until you taste it! Seasoning your favorite recipes with our specially labeled Vitality™ dietary essential oils lets you savor all their spicy, herbaceous, fruity potential. Here are three ways to take essential oils internally:

- Add to a glass of water.
- Take in a vegetarian capsule.
- Use a drop in place of herbs, zest, or juice.

Safety tip: Be sure to start small—a little goes a long way! Always make sure the oil is specifically labeled for ingestion; otherwise, assume it's safe for external use only.

Different oils offer different benefits depending on how and where you apply them. Be sure to check the label directions and discover what works for you, and if you have questions or concerns, please check with your health care provider.

YOUNG LIVING® EINKORN:
The ancient grain

Einkorn, or *Triticum monococcum*, offers so much nutrition in every single kernel. This ancient grain, historically considered the staff of life, is one of the only grains today that hasn't undergone genetic engineering or hybridization. It maintains the simplest genetic code of all the varieties of wheat with just one genome and 14 non-GMO chromosomes, exactly what the body understands and can digest. So, what happened? How did the grains of today become so different and—we're beginning to learn—so toxic to the body?

Gary Young had a sense of the dangers of today's wheat as he watched the deterioration of the human body as people ate more and more bread and various flour products. He began his search for alternatives and found einkorn seeds in Jordan, only to later discover that einkorn was being grown on the Simiane-la-Rotonde Lavender Farm in France and used for animal feed.

In the mid-1900s, biologist Dr. Norman Borlaug worked on a wheat cross-breeding project in Mexico, intending to increase production yield. His success was the beginning of the genetic engineering and hybridization of wheat and other grains, beginning the decline of human health through a food that the body could no longer recognize and digest.

Gluten free is not the answer to this increased hybridization. For those without severe sensitivities, the body needs gluten in the right proportion. However, when modern grains are altered to produce what the body can't digest, the gluten begins to overload the body and create all kinds of problems.

This led Gary to begin growing einkorn for Young Living and create Einkorn Pancake and Waffle Mix, so we could enjoy that kind of food without the negative effects of the hybridized flours sold in the market today. As people began to catch on to what they were eating and how it was hurting them, the demand for einkorn grew. As a result, our line of einkorn products has grown as well. Once you discover how nutritious and tasty einkorn is and the different ways you can use it, you'll fall for our einkorn creations.

It's also important to know that our farms have never been sprayed with any chemicals, especially with glyphosate. There are over 750 glyphosate-containing products sold in the U.S., making this chemical more prevalent in the foods we buy commercially.

Gary's book *Ancient Einkorn, Today's Staff of Life* is a must-read when educating yourself about this ancient grain and beginning a path toward better health. Also, *Baking & Cooking with Einkorn* by Heidi Ellis is a great tool to learn how to cook with einkorn at home. Both are sold through Young Living.
