Greetings everyone!

Helichrysum is one of those versatile, potent, powerhouse oils that deserves a place in everyone's natural home farm-acy.

After taking a quick look at the testimonial headings below ([click here](#)), it's not hard to see why so many people view helichrysum as the oil of choice for accident emergencies, wound healing and long standing challenges like hearing support, tissue regeneration, chronic pain and *much* more. Click on the hot links to view the testimonials. Some are really amazing to me, even after all these years with Young Living.

For instance:

### **Bruise and unexpected results with dementia**

Submitted by Bonnie Andresen

*My mother will be 90 this year and has advanced dementia. She fell and got a nasty bruise at the base of her spine. I went to the desk reference to see what oils to try and was directed to Helichrysum to help bruising, lavender for skin, and peppermint for pain. I had the care giver alternate these oils every 2 hours.*

*The healing of the bruise was remarkable, but unexpectedly my mother became very happy and started to be able to carry on a coherent conversation-something she had not done in a long, long time. Puzzled, I went back to the desk reference to try to understand what was happening. I cross referenced and found*

*that Helichrysum stimulates the neurotransmitters of the brain and is uplifting to the subconscious.*

*In addition, the oils were applied at the base of the spine which probably had more of an effect on the brain. Even more amazing - she had been taking long naps-sleeping much of her days away. She started reading. I now check out large print books from the library for her and she has finished 5 books! This showed me that we may use the oils to achieve one result and other wonderful side results can occur. Until you try them, you don't know what amazing things can happen.*

~and~

## **Nerve deafness restored with helichrysum**

Submitted by Trudie Crawford

*My sister has had nerve deafness in her left ear for 19 years. It came on very suddenly and her doctor told her there was nothing they could do about it.*

*After listening to 'The Missing Link' by Gary Young and learning that in Egypt they had experimented with Helichrysum for nerve deafness with success, I called my sister and encouraged her to give it a try. What did she have to lose? I did warn her however, that it could take between 6-12 months of putting the oil on every day before she would see a significant result. She faithfully put one drop on every day. Six months later, she had regained 55% of her hearing in the left ear. Ten months later she had regained 70% of her hearing. She continues to put one drop on every day and is enjoying the benefits of her restored hearing.*

Note the importance of consistency and patience. Often we stop using the oils before they have a chance to work.

It's also good to keep in mind that while other brands of essential oils might claim to have the best, Young Living has proven that they have the best...time and time again. When your and your family's health and well being are at stake, why settle for anything less than Young Living?

Oily regards and healing wishes to you and yours,  
Barbara

## GET A FREE HELICHRYSUM ESSENTIAL OIL

During the month of February, order 215 PV on any of your favorite Young Living products, and receive one 5ml bottle of helichrysum for FREE. *That's a retail value of \$102.30!*

One of Young Living's most popular essential oils, helichrysum was traditionally used to mitigate bruising and varicose veins, as well as to support circulatory health and relieve muscle tension.\*

Only the *Helichrysum italicum* grown in the Mediterranean region meets our stringent Young Living Therapeutic Grade™ (YLTG) sourcing standard. Competitors commonly add various essential oil bases to produce a cheaper, synthetic helichrysum, but only YLTG helichrysum undergoes strict quality control standards and is proven to be pure, potent, and to contain the optimal levels of the important compound neryl acetate.

\*Modern medical research has not yet validated these historical claims.
